Salon Professionals are in a unique position to recognize signs of abuse in their clients. Because of the intimate and nurturing nature of the relationship between salon professionals and their clients, salon professionals can often spot signs of physical abuse that others may never see. Salon professionals are skilled and experienced listeners who are personally interested in those around them, so many victims suffering from abuse feel comfortable confiding in them - even if they would never tell anyone else. For abused women, the salon may be the ideal environment to seek out help because it may be the one place she is allowed to go without her abuser.
